summary

Accomplished software engineer with 7+ years of experience building products (SaaS) using a range of technologies including Ruby/Rails, Python and JavaScript with multiple frameworks, relational and NoSQL databases.

experience

apr/2015-Now **Senior Developer at 77Agency**

<http://www.allin1social.com>, Italy

Main Developer on Allin1social

- ◆ Performed extensive bugfixing, reduced the legacy code complexity, improved code design and quality according to every measurable metric.
- ◆ Reduced the time spent by support staff by creating tools that brought to surface the most critical issues affecting the clients experience.
- ◆ Improved the data retrieval, integration and processing mechanism, both by optimizing existing tasks and also by applying advanced heuristics, which led to an 82% reduction of the overall daily/hourly workload, and a considerable service reliability boost.
- ◆ Main technologies used: Ruby / Rails, MongoDB, Redis, JS / ReactJS.

2004-apr/2015 **Freelance Developer**

Brazil, Italy

Developer

Worked as a Freelance Developer since 2004, having worked with a comprehensive set of technologies, including Ruby, Python, PHP (using CodeIgniter, Wordpress, Magento), JS/CoffeeScript, AngularJs and ReactJs.

particular projects

2012-2014 **Miviro**

<http://www.miviro.com.br>

Lead Developer

Miviro is a social network/management tool for tour agencies, developed with Ruby on Rails, HTML5, CSS3 and plenty of Javascript/Ajax. Implementation of new features, database and application redesign. Implemented a natural query interface to the database.

2011 **Vertix CMS**

Standalone project

Lead Developer

Vertix was a Content Management System developed from scratch as a mean to practice and learn the Ruby on Rails framework. The resulting application was surprisingly easy to use, leading many of my clients to migrate to it.

education

2011-2015 **Bachelor** of Computer Science, graduated *cum laude*
Laurea in Informatica

Università degli Studi di Milano

about me

I started programming at the age of 11 and working professionally at the age of 19. While being a self-taught programmer contributed significantly to my problem solving skills, I decided to pursue a more conscious and comprehensive knowledge of the computing ecosystem, enrolling for a Bachelor Degree in Milan/Italy, which I completed *cum laude* in april 2015. I've also worked as a professional (theater) actor in Brazil, for more than 5 years! As a result, I love speaking in public, presenting ideas, products or projects. My ideal work scenario is a team-based product-centered development environment.
